Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto, US 6,236,802.

As per claims 1-28, Yamamoto teaches an information processing system setting a parameter (special effects filtering, etc.) related to target data (video/ still image), comprising:

an output unit outputting the target data;

an operation unit detecting a user's indication (editing changes);

Art Unit: 2182

an output control unit changing a parameter value sequentially as the time elapses (col. 6, lines 10-col. 8, lines 1-42, and col. 12) and outputting the target data with the parameter value set, from said output unit; and

a processing unit establishing the parameter value when detecting the user's indication as a parameter value related to the target data. (Abstract, cols. 1-20)

Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Imai et al., US 6,744,968.

As per claims 1-28, Imai teaches an information processing system setting a parameter (edit module, composition module, or special effects module) related to target data (video/ still image), comprising:

an output unit outputting the target data;

an operation unit detecting a user's indication (editing changes);

an output control unit changing a parameter value sequentially as the time elapses (col. 12, lines 1-col. 14, lines 1-30, and col. 12) and outputting the target data with the parameter value set, from said output unit; and

a processing unit establishing the parameter value when detecting the user's indication as a parameter value related to the target data. (Abstract, cols. 1-21)

Art Unit: 2182
